Know And Know It Well... STAY AWAY FROM THIS ANIMAL HOSPITAL IF YOU ARE TO STAY ALIVE. STAY AWAY IF YOU WANT YOUR LOVED ONES TO STAY ALIVE... For 11 days in Mid November 2010, our precious Wanda Nida was treated by these animals. They had animal doctors (and still have) like Meera M. Madappallil and Maher M. Najjar (her pulmonologist) from Terroristan who totally mistreated our precious matriarch. They put her on intubation tubes and kept her on it until she died because her 88 years and 7 months old body's immune system had to go after such a long time and she developed hospital pneumonia which is most dangerous. The hospital staff had to be constantly reminded to clean her intubation tubes at least every 4 hours, as required by their crappy protocols and they did not do it even once in a whole day so Wanda was choking on her phlegm and bacteria and parasites and they kept her uncomfortable all the time, more thirsty than living without Oasis on Sahara Desert:

The animal doctors never approached us how to resolve Wanda's problems. They also kept her very uncomfortable by aving her tied to bed for all 11 days she was in this animal hospital. They never suggested what's best option for her and they never returned our phone calls knowing we were suffering emotionally very deeply. Here's additional eternal truth:

<http://encyclopediasupreme.org/babcia/gottliebmemorialanimalhospital.txt> SO TELL OTHERS NOT TO GO HERE; NOT ONLY WILL THEY SCREW YOU TO DEATH BUT WHEN YOU COMPLAIN, THEY WILL CALL COPS ON YOU AND THREATEN YOU WITH ARREST FOR BOTHERING THEM AND TELLING THEM HOW TO DO THEIR CRAPPY JOBS...

Avoid this hospital at all costs. Both of my parents died here. I do not believe the care they received was particularly good. I have a friend whose mother was admitted here and he was furious with the "care" she received. There are better options than this place. Go to Lutheran General instead.

Poor Dr/patient communication. From our experience Drs not conferring with experts when running into complications all the while the patient is racking up a fortune in ICU/Dr bills while the Dr tries to dabble in a field in which he has'nt a clue and should be consulting with someone who has expertise. That is common sense if you do not know something, find someone who does. Dr & hospital opening themselves up to lawsuits due to negligence. Another minus is many nurses/aides do not speak English well. Are the hospitals now cutting costs or finding the cheapest labor in order to profit more. Would never have a family member here again. Sad because my daughter was born here in the 90's and it was great.
