Individual Will. \$60

HOCUS-FOCUS

FIND AT LEAST 6 DIFFERENCES BETWEEN PANELS.
Differences: 1. Hot dogs are missing. 2. Spatula is smaller. 3. Apron is shorter. 4. Neckline is different. 5. Belt is different. 6. Bottle is missing.

CHESS: A UNIVERSAL GAME FOR ALL RACES

1996 Taft H.S. graduate Lupo Steriev is a U.S. National Chess Master and has received a Top 10 junior ranking in the sport. His ranking and national master title were determined by the U.S. Chess Federation.

While at Taft, his team finished 5th in the city high school championship, despite missing 2 players.

The game of chess recently was in the national spotlight when the world champion took on a computerized "chess machine" designed by IBM. This machine reportedly can calculate up to 200 million moves a second.

Steriev enjoys the challenge of trying to defeat some of the top chess computer programs. "I'm stronger against a computer than a human. There is no psychological involvement," said Steriev, who supports the effort to make chess an Olympic sport. Chess is a combination of science, art and game, he says.

Steriev himself has worked to enhance or redesign one of the top computer programs. His company has made available "Chess Master 21st Century." The program, which Steriev describes as for players of all levels, can be obtained by sending a \$5 check or money order to:
