

Iraq Body Count urgently needs your support to keep track of casualties - help us with a [donation](#) now

This data is based on 51,607 database entries from the beginning of the war to 28 Feb 2017, and on monthly preliminary data from that date onwards. Preliminary data is shown in grey when applicable, and is based on approximate daily totals in the [Recent Events](#) section prior to full analysis. The full analysis extracts details such as the names or demographic details of individuals killed, the weapons that killed them and location amongst [other details](#). The current range contains 36,565–38,407 deaths (20%–18%, a portion which may rise or fall over time) based on [single-sourced reports](#).

Graphs are based on the higher number in our totals. Gaps in recording and reporting suggest that even our highest totals to date may be missing many civilian deaths from violence.

Monthly civilian deaths from violence, 2003 onwards

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
